SKILLS

LANGUAGES

- Python
- JavaScript
- SQL

FRAMEWORKS & LIBRARIES

- React / Vite
- FastAPI
- Node.js
- TensorFlow / Keras
- scikit-learn

TOOLS & PLATFORMS

- Git & GitHub
- SQLite
- AWS (IAM, VPC, EC2)
- Ollama (local LLM)
- Gradio

EDUCATION

B.Sc. Computer Science
Kwara State University (KWASU)
2022 – 2026 (Expected Nov 2026)
Malete, Nigeria

TRAINING

- Udacity x AWS AI & ML Scholars Program
- SIWES — United Bank for Africa (UBA)

INTERESTS

- Basketball
- Chess
- Formula 1
- Machine Learning

ABOUT ME

Motivated software and machine learning developer skilled in building full-stack applications and AI-powered solutions with Python, React, and FastAPI. Passionate about solving real-world problems, from healthcare diagnostics to job-search access for students. Always eager to learn, ship fast, and take on new challenges.

EXPERIENCE

SIWES Industrial Trainee Sep 2025 – Jan 2026

- Gained hands-on experience with core AWS services — IAM, VPC, and EC2 — in a live banking IT environment.
- Supported infrastructure and cloud-related tasks as part of the bank's technology team.

AI & ML Scholar Ongoing

- Selected participant building applied machine learning skills through an AWS-backed scholarship curriculum.

PROJECTS

Diabetic Retinopathy Detection System [Python, TensorFlow/Keras, DenseNet121, Gradio]

- Trained a DenseNet121 model on the APTOS 2019 dataset, reaching 96.19% accuracy and 0.9940 AUC-ROC.
- Achieved 98.31% precision and 94.09% recall; deployed as an interactive Gradio demo app.
- Used as the primary technical project for final-year thesis defense and job/scholarship applications.

Undergrad — Nigerian Job Aggregator [FastAPI, SQLite, React/Vite, JWT]

- Built a zero-cost, local-first job platform for Nigerian students aggregating 2,000+ listings from multiple sources and custom scrapers (Jobberman, MyJobMag, HotNigerianJobs).
- Implemented multi-user authentication (JWT/bcrypt), resume upload, and persistent user profiles.
- Designed a tiered job-extraction pipeline (structured data → HTML parsing → LLM fallback via Ollama) for manual job submissions.

HomeCommand — Home Maintenance Tracker [React, Supabase, AI/OCR]

- Built an AI-powered home maintenance tracker with photo-based inspection and contractor quote scam detection via OCR.
- Integrated an AI chat assistant for maintenance guidance; project is ~85% complete and being migrated to a dedicated Supabase instance for public deployment.

ADDITIONAL

Languages: English (Fluent), Yoruba (Native)
